

QUICK GUIDE

Transforming Data into Strategic Decisions

At Data Pulse Analytics, we drive business growth by digitally transforming organizations with Artificial Intelligence, Software Development, and Data Analysis. Our goal is to ensure that decision-making is supported by objective and accurate data.

1 THE COMMON CHALLENGE: WHY DO COMPANIES STAGNATE?

Many organizations face obstacles that limit their growth and innovation. We identify the most common issues:

Inefficient Processes: Manual, repetitive, and tedious tasks that cause duplication of efforts and poor information management.

Unused Data: Accumulation of large volumes of information without extracting their value or knowledge to turn them into strategic assets

Limited Infrastructure: Outdated storage systems that affect business scalability and compromise information security.

Decisions Based on Intuition: Reliance on “gut feelings” instead of objective analysis, increasing risk in the company’s strategic direction.

Obstacles to Innovation: Lack of technological tools that prevent companies from adapting to market changes and expanding their capabilities.

2 OUR SOLUTIONS: A PRACTICAL, TAILORED APPROACH

We offer a clear and structured process to implement digital transformation in your company.

Custom Software Development

- **What we do:** We build platforms and tools tailored to your operations, such as inventory systems, sales systems, or CRMs, ensuring digital and automatic data recording.
- **Success Story (UANL):** We developed a medical application for the digital recording of gastroenterological reports. This allowed them to go from disorganized files to structured, instantly accessible information.

Process Automation with AI

- **What we do:** We transform manual, repetitive tasks into efficient digital processes, reducing execution times and minimizing human error.
- **Success Story (GLOBX):** We automated the data analysis previously done in Excel spreadsheets. Report analysis time was reduced from 480 minutes to just 2 minutes per person.

Data Analysis and Visualization

- **What we do:** We turn complex data into useful information through intelligent, automated dashboards that reveal key patterns.

- **Success Story (Mochomos):** We implemented dashboards that allowed them to visualize in real time indicators such as total daily sales and best-selling products, enabling instant strategic decisions.

Artificial Intelligence (AI) and Predictive Analytics

- **What we do:** We design AI models to predict critical metrics such as sales or production and implement intelligent agents like chatbots.

- **Success Story (Ganfer):** We developed an AI model to estimate agricultural production, eliminating uncertainty and enabling them to meet sales agreements with great accuracy.

Data Management and Centralization

- **What we do:** We consolidate all company information into robust databases (SQL) and cloud infrastructures (AWS, Google Cloud), ensuring security and scalability.
- **Success Story (Ganfer):** We centralized their greenhouse information into a secure relational database, transforming their disorganized data handling into a structured, reliable system.

3 OUR DIFFERENTIATOR: WHY CHOOSE US?

DEEP UNDERSTANDING:

We don’t just focus on the strategic vision — we seek to understand the essence and aspirations of each client.

SCALABLE PROJECTS:

We conceptualize and develop long-lasting projects capable of growing alongside your company.

RESPONSIBILITY AND OWNERSHIP:

We take on each project with a deep sense of responsibility to ensure you achieve your goals.

CONSTANT SUPPORT:

We remove obstacles that limit growth and innovation, transforming your company into a highly competitive organization.

4 THE NEXT STEP:

We recognize the importance of each initiative and value it as an opportunity to build precise, data-driven strategies. We invite you to explore your project’s potential and strengthen your company’s capabilities toward a future of innovation.

MORE THAN A HUNCH, IT’S DATA.

At Data Pulse Analytics, we help you implement real solutions that make your company grow.
